

L'enquête mammifères organisée par la Société Française d'Etude et de Protection des mammifères touche à sa fin.

Ce travail patronné par le secrétariat Faune-Flore aboutira en juin 1983 sur la sortie d'un atlas national. Les cartes qui suivent illustrent le travail effectué en Picardie. Chaque point correspond à un indice de présence récent (moins de 50 ans) sur la carte au 1/50.000ème. On notera le peu de données sur un certain nombre de secteurs de l'Oise et de l'Aisne. Nous incitons tous les lecteurs de Picardie-Nature à nous envoyer très rapidement leurs observations (taupe et lapin compris) afin d'obtenir une couverture géographique la plus complète possible.

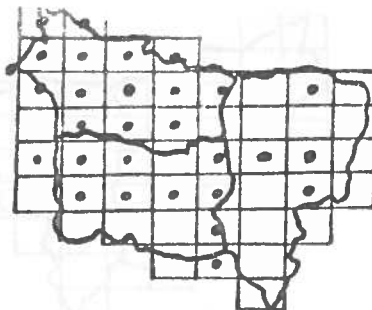

Liste des observateurs :

Baudry F. et G. , Bellard J., Biet P. , Bouckaert V. , Combecy A.M et X
 Deboulonne A. , Delahoche C. , Demarcy E. , Devisse R. , Dordain F. ,
 Duguy R. , Dupuich H. , Duquet M. , Flohart G. , Fredon A.M. , Gailly
 Hernandez C. , I.N.R.A - Jouy en Josas . , Kerautret L. , de Larminat
 Legrand E. Libois R. , Martin C. , Masson D. , Mesnard C. , Moutadert M.
 Nosal J. , Pigeon P. , Pourreau J. , Prévost J. Ranson N. , Rigaux T.
 Riols C. , Robert J.C. , Royer P. , Saint Girons M.C. , Sueur F. ,
 Thiéry I. PH. et S. , Tombal G. , Triplet F. Turpin F. , Verière I. ,
 Vigneux J.L. , Voisin J.F.
