BILAN PROVISOIRE DE L'ENQUÊTE MAMMIFÈRES EN PICARDIE

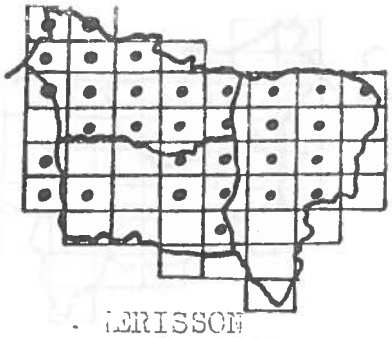

par P. Triplet

L'enquête mammifères organisée par la Société Française d'Etude et de Protection des mammifères touche à sa fin.

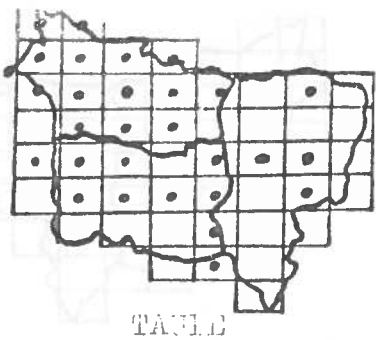

Ce travail patronné par le secrétariat Faune-Flore aboutira en juin 1983 sur la sortie d'un atlas national. Les cartes qui suivent illustrent le travail effectué en Picardie. Chaque point correspond à un indice de présence récent (moins de 50 ans) sur la carte au 1/50.000ème . On notera le peu de données sur un certain nombre de secteurs de l'Oise et de l'Aisne. Nous incitons tous les lecteurs de Picardie-Nature à nous envoyer très rapidement leurs observations (taupe et lapin compris) afin d'obtenir une couverture géographique la plus complète possible.

Liste des observateurs :
Baudry F. et G. , Bellard J.,Biet P. , Bouckaert V. , Commecy A.M et X Deboulonne A. , Delahoche C. , Demarcy E. , Devisse R. , Dordain F. , Duguy R. , Dupuich H. , Duquef M. , Flohart G. , Fredon A.M. , Gailly Hernandez C. , I.N.R.A - Jouy en Josas . , Kerautret L. , de Larminat Legrand E. Libois R., Martin C. , Masson D. , Mesnard C. , Moutadert M Nosal J. , Pigeon P. , Pourreau J. , Prévost J. Ranson N. , Rigaux T. Riols C. , Robert J.C. , Royer P. , Saint Girons M.C. , Sueur F. , Thièry P. PH. et S. , Tombal G. , Triplet P. Turpin F. , Verière I. , Vigneux J.L. , Voisin J.F.
